Question 2.04

TOTAL POINTS 1

1.The SAS data set **Cereal** contains the categorical predictor variable **Process** and the continuous response variable **Weight**.

1 / 1 point

Complete the MODEL statement in the program below to perform a one-way ANOVA.

```
1   proc glm data=cereal;
2       class process;
3       model _____ = _____;
4       means process/hovtest;
5   run;
6   quit;
7
```

Process = Weight

✓ **Correct**

In the MODEL statement, you specify the variables as indicated in the ANOVA model: dependent, or response variable = independent, or predictor variable.

```
1   proc glm data=cereal;
2       class process;
3       model Weight = Process;
4       means process/hovtest;
5   run;
6   quit;
7
```
